The National Research Council (NRC) administers competitive Postdoctoral and Senior Research Awards on behalf of the Air Force Office of Scientific Research. These awards are tenable at the Air Force Research Laboratory's nine technical Directorates, the United States Air Force Academy, and the Air Force Institute of Technology. Awards are for 1-3 years and are available to Ph.D. holding scientists and engineers at all stages of their careers. The awardees have the opportunity to conduct independent research in areas of science and engineering that add to the knowledge base, are compatible with the research needs, and further the interests of the Air Force.

A small sample of ongoing research efforts being conducted includes: Computational Fluid Dynamics Analysis and Code Development Applied to Unsteady Aerodynamics; Quantum Interference and Carrier Scattering in Quantum Wells; Investigation of Transonic Limit-Cycle Oscillation of a Wing with External Stores; and Investigation of the State-to-State Rotational Relaxation Rate Constants for Carbon Monoxide Following Collisions with Inert Gas Atoms Using Infrared Double Resonance.

Associates on tenure were citizens or Permanent Residents of 11 countries. While on tenure, the average Associate published one journal article and made four domestic presentations. Post-tenure plans included college or university professorships, US or foreign laboratory researchers, and post-doctoral appointments.

Re: Contract No. F49620-96-C-001 Final Status Technical Report

Dear Dr. Moses:

The enclosed technical report is to fulfill our contractual obligations for:

Contract	F49620-96-C-001
Cost Center	8016
Title	Air Force Research Laboratory Resident Research Associateship Program
Contract Period	October 15, 1995 – October 14, 2002

The report covers the period August 15, 2001 through October 14, 2002. This report fulfills contractual requirements for technical reports. The original report and three copies are enclosed for your use.

Sincerely yours,

Robert H. Manka
Associate Director and
Program Administrator

RESEARCH ASSOCIATESHIP PROGRAM

with the

Air Force Research Laboratory

Final Annual Contract Technical Report

Report Period: August 15, 2001 – October 14, 2002

Contract Number: F49620-96-C-001

Publicity

The National Academies Research Associateship Programs for the contract period were announced to the scientific community in the fall of the preceding year, 2000. Publicity materials describing the NRC-AFRL Program were distributed in November to presidents, graduate deans, and heads of appropriate science and engineering departments and minority-affairs offices of all academic degree-granting institutions in the United States. An e-mail announcement of the Programs was sent to these same contact points prior to each review deadline. Promotional materials were sent to Laboratory Program Representatives, Associateship Advisers, and other interested persons. General advertisements of Programs were placed in leading scientific and engineering publications. Publicity materials and other related information were made available on the internet. Research Associateship Programs staff attended numerous society meetings and minority recruitments to promote the various Programs and meet with prospective applicants throughout the year.

Requests

Application materials were distributed in response to specific requests for information about the NRC-AFRL Research Associateship Program or as a result of general requests by persons whose fields of specialization appeared to be appropriate for the research opportunities available in the AFRL laboratories.

Competition

Panel reviews of applicants for the Research Associateship Programs, including those with the Air Force Research Laboratory, are conducted in February, June, and October of each year. The following is a breakdown of the action taken with the applications during the report period.

	<u>Oct. 01</u>	<u>Feb. 02</u>	<u>June 02</u>	<u>TOTAL</u>
TOTAL APPLICATIONS	15	12	8	35
Number of Applications Reviewed	11	10	6	27
Applications Not Recommended (did not pass Review)	0	0	0	0
Applications Recommended (passed Review)	11	10	6	27
Awards Offered	9	9	4	22
Awards Accepted	7	8	4	19
Awards Declined	1	1	0	2
Awards Withdrawn by NRC (NRC officially withdrew award <i>after</i> it had been accepted.)	1	0	0	1

Associates' Citizenship

Associates on tenure as of August 15, 2001, were citizens or Permanent Residents of the following countries:

Belarus	1	Japan	1
Bulgaria	1	Republic of Korea	3
England	1	Russia	1
Germany	1	Turkey	1
Greece	1	United States	30
India	3		

Associates' Activities

Associates who ended tenure during the report period were on tenure for an average of 17 months, ranging from 4 months to 36 months.

Of the 14 Associates who ended tenure during the report period, 7 (50%) submitted reports. In the termination reports, Associates indicated the following scholarly activity while on tenure.

7	Articles Published in Refereed Journals	30	Domestic Presentations
0	Patent Applications	0	Award
2	International Presentations		

After ending their tenure, Associates indicated their future plans as follows:

2	College or University Professor	2	Research Position at Foreign Gov't. Laboratory
1	PostDoc		
1	Unemployed		
1	Research – National Government (US or Foreign)		

In their final reports, Associates were asked to evaluate certain aspects of their experiences on a scale of 1 (low) to 10 (high). The average rating for each item follows:

----	<i>Short-Term Value:</i>	Development of knowledge, skills, and research productivity
----	<i>Long-Term Value:</i>	How your NRC Research Associateship affected your <i>career</i> to date
8.0	<i>Laboratory:</i>	Quality of the support you received from the federal <i>Laboratory</i>
8.1	<i>NRC:</i>	Quality of the support you received from the <i>NRC</i>

Advisers also were asked to complete an evaluation of the Associate. The following summarizes the Adviser evaluations for Associates ending tenure during the contract period. Of the 14 Associates who ended tenure, 2 (48%) Adviser evaluations were completed. Assessments were made on four criteria using the following rating scale: 1-below average, 2-average, 3-above average, 4-good, and 5-outstanding/exceptional. The average rating for each item follows:

3.0	Knowledge of Field	3.5	Independence
4.0	Innovative Thinking	5.0	Motivation
4.5	Research Techniques	4.0	Overall Scientific Ability

The Adviser was asked, "Would you like this Associate as a Professional Colleague?" The Advisers responded in the following manner:

2	100%	Yes	0	0%	No Comment
0	0%	No	0	0%	No Answer

Additional information about the Associates' activities can be found in the attachments described below and the Appendix.

Attachment 1: Associates who ended their tenure between August 15, 2001, and October 14, 2002. It includes the Associate's Laboratory location, the starting and termination dates, and the names of their Advisers. Associates are required to submit reports upon termination, and Advisers are asked to submit a final evaluation of each Associate. Associates who have not submitted a termination report have received follow-up correspondence.

Attachment 2: Associates on tenure as of October 15, 2002. This list includes the Associate's Adviser, Laboratory location, start and expected termination dates, and country of citizenship.

Attachment 3: Applicants who received and accepted awards between August 15, 2001, and October 14, 2002. It includes the title of the research proposals.

Attachment 4: All recommended candidates by category (e.g., Accepted, No Funding, Declined, etc.). This report includes information about the Ph.D. institution, title of proposed research, starting date, and Adviser.

Attachment 5: Cross tabulation of the number of Associates on tenure at each Center by quarter for the year within the report period and for the years preceding and following the report period.

Attachment 6: Patent applications, if applicable, and Summaries of Research from the Associates' Final Reports. This list includes the patent application titles, inventor(s) and date of application.

Appendix: Final Reports received from the Associates who ended tenure during the report period.

Associates Who Ended Tenure 8/15/2001 - 10/14/2002

Citizenship: India	Ohio State University
Adviser: Dr. James R. Cloutier	Actual Starting Date: 7/08/02
Research Field: Aero/Astro Engineering	Termination Date: 7/07/03
Research Title: Reconfigurable Architecture for Cooperative Control	
BOLENDER, MICHAEL A	Ph.D. Date: 2000
Citizenship: United States	University of Cincinnati/OH
Adviser: Dr. Andrew Sparks	Actual Starting Date: 4/29/02
Research Field: Aerospace Engineering	Termination Date: 4/28/03
Research Title: Improvement of Control Allocation Algorithms as Applied to the Adaptive/Re-Configurable Control of Hypersonic Vehicles	
CACCIANI, ALESSANDRO	Ph.D. Date: 1961
Citizenship: Italy	U Roma La Sapienza-Citta U/Italy
Adviser: Dr. Richard C. Altrock	Expected Starting Date: 1/15/03
Research Field: Astrophysics	Termination Date: 1/14/04
Research Title: Two-lines Doppler and Magnetic Imaging of the Sun Through the Magneto-Optical Filter	
CHAMBREAU, STEVEN D	Ph.D. Date: 2002
Citizenship: United States	Univ of California-Riverside
Adviser: Dr. James A. Dodd	Actual Starting Date: 5/01/02
Research Field: Chemistry	Termination Date: 4/30/03
Research Title: Reaction Pathways in Hyperthermal O-Alkene Interactions	
HAN, KEESOOK J	Ph.D. Date: 2001
Citizenship: United States	University of Minnesota-Twin Cit
Adviser: Dr. Bruce Suter	Actual Starting Date: 5/30/02
Research Field: Electrical Engineering	Termination Date: 5/29/03
Research Title: Multirate and Wavelet Signal Processing	
HOSTUTLER, DAVID A	Ph.D. Date: 2002
Citizenship: United States	University of Kentucky
Adviser: Dr. Gordon D. Hager	Actual Starting Date: 6/03/02
Research Field: Spectroscopy	Termination Date: 6/02/03
Research Title: Study of the Rotational Relaxation Rates of NO by Double Resonance and Zeeman Spectroscopy	
JEFFERSON, GEORGE J	Ph.D. Date: 1999
Citizenship: United States	University of Pennsylvania
Adviser: Dr. Ronald J. Kerans	Actual Starting Date: 10/01/02
Research Field: Materials Engineering	Termination Date: 9/30/03
Research Title: Analytical and FEM Models for Integrated Design of Novel Hybrid Composite Materials/Components	

RYU, MEE-YI		Ph.D. Date: 2001	
Citizenship:	Republic of Korea	Kwangwoon University/Korea	
Adviser:	Dr. Yung Kee Yeo	Actual Starting Date:	5/01/02
Research Field:	Engineering Physics	Termination Date:	4/30/03
Research Title:	Electrical and Optical Studies of As-Grown and Ion-Implanted Wide Bandgap Semiconductors		

8- Declined

UPATNIEKS, ANSIS		Ph.D. Date: 2002
Citizenship:	United States	University of Michigan-Ann Arbor
Adviser:	Dr. Thomas A. Jackson	
Research Field:	Fluid Dynamics	
Research Title:	Time-Resolved Imaging of Unsteady FLOW Phenomena in Scramjet Combustors	

June 2002

1- Recommended (2 Applicants listed)

BURRILL, ANDREW B		Ph.D. Date: 2002
Citizenship:	United States	State U of New York-Stony Brook
Adviser:	Dr. Steven M. Miller	
Research Field:	Chemical Physics	
Research Title:	Laser Induced Fluorescence Studies of the Products of the Reactions of Propene, Vinyl Radical and Allyl Radical with Hyperthermal Oxygen Atoms	

YANG, SANG H		Ph.D. Date: 1996
Citizenship:	United States	U of Illinois-Urbana-Champaign
Adviser:	Dr. Rajiv Berry	
Research Field:	Physics and Engr Physics	
Research Title:	Nanoparticle Simulations for Efficient (25-35%) Flexible, Thin-Film Photovoltaics	

A- Accepted Award (4 Applicants listed)

ANDERSON, KELLY L		Ph.D. Date: 2002	
Citizenship:	United States	University of Cambridge/England	
Adviser:	Dr. Barry L. Farmer	Actual Starting Date:	9/10/02
Research Field:	Molecular Physics	Termination Date:	9/09/03
Research Title:	Modeling Structure Development in Polymer-Clay Nanocomposites		

FERNANDEZ, ABEL		Ph.D. Date: 2002	
Citizenship:	United States	Rensselaer Polytechnic Inst/NY	
Adviser:	Dr. Albert A. Viggiano	Actual Starting Date:	10/07/02

SATHIRAJU, SRINIVAS
Citizenship: India
Adviser: Dr. Paul N. Barnes
Research Field: Engineering Phys and Mat Sci
Research Title: Studies on Process Conditions, Structure-Property Relationship of Second Generation Coated Conductors on Various Metal Substrates

Ph.D. Date: 1997
University of Hyderabad/India
Actual Starting Date: 10/01/02
Termination Date: 9/30/03

TIKHONOV, NIKOLAY I
Citizenship: Russia
Adviser: Dr. Daniel W. Repperger
Research Field: Computer Science
Research Title: Intelligent Parametric Visual Thinking System (IPVTS) as Paradigm for Control Strategies in Robotics

Ph.D. Date: 1976
Moscow Automech Inst/Russia
Actual Starting Date: 8/20/02
Termination Date: 8/19/03

October 2002

1- Recommended (12 Applicants listed)

ALTSHULLER, DMITRY A
Citizenship: United States
Adviser: Dr. Daniel W. Repperger
Research Field: Cybernetics
Research Title: Human System Power (Haptic) Management System Using Methods of Absolute Stability

Ph.D. Date: 2002
St. Petersburg State Univ/Russia

ANDERSON, STANLEY E
Citizenship: United States
Adviser: Dr. Shawn H. Phillips
Research Field: Polymer Science and Engr
Research Title: Structural Studies of Polyhedral Oligomeric Silsesquioxane (POSS) Polymers and Precursors

Ph.D. Date: 1969
U of Illinois-Urbana-Champaign

CAO, YONG-YAN
Citizenship: People's Republic of China
Adviser: Dr. Daniel W. Repperger
Research Field: Control Systems
Research Title: Analysis and Design of Force Reflecting Teleoperators with Large Time Delays

Ph.D. Date: 1996
Zhejiang University/China P-Re

COOKE, NANCY J
Citizenship: United States
Adviser: Dr. Winston Bennett, Jr
Research Field: Applied Psychology
Research Title: Knowledge Assessment for Distributed Mission Training

Ph.D. Date: 1987
New Mexico State University

Recommended Candidates 8/15/2001 - 10/14/2002
Air Force Research Laboratory

Attachment 4

1/10/2003 Page 6 of 7

JOHNSON, DAVID W
Citizenship: United States
Adviser: Dr. Nelson H. Forster
Research Field: Chemistry
Research Title: Interaction of Aryl-Phosphate Based Lubricant Additives with Modern Bearing Materials

Ph.D. Date: 1983
Illinois Institute of Technology

KELLEY-LOUGHNANA, NANCY
Citizenship: United States
Adviser: Dr. John M. Frazier
Research Field: Biomolecular Engineering
Research Title: Designing Tools for Biomolecular Network Modeling

Ph.D. Date: 2000
Boston University/MA

KHOLODAR, DENIS B
Citizenship: Russia
Adviser: Dr. Scott A. Morton
Research Field: Aeronautical Engineering
Research Title: Computational Aeroelasticity of Full Aircraft

Ph.D. Date: 2002
Duke University/NC

LEVIN, GEORGE A
Citizenship: United States
Adviser: Dr. Paul N. Barnes
Research Field: Physics
Research Title: The Effects of Sheared Flow of Magnetic Vortices on Electrical Conduction in High-Tc Superconductors

Ph.D. Date: 1994
Kent State University/OH

MCCLAIN, MARK D
Citizenship: United States
Adviser: Dr. Douglas S. Dudis
Research Field: Polymer Chemistry
Research Title: Electroactive Polymers of Thiazolo(5,4-d)thiazole for Electronic Applications

Ph.D. Date: 1994
University of Michigan-Ann Arbor

MORENO, LUIS A
Citizenship: United States
Adviser: Dr. William B. Albery
Research Field: Aviation Medicine
Research Title: Evaluation of an Integrated Sensory Cueing System for Spatial Disorientation Countermeasures in the Maneuvering Acceleration Environment

Ph.D. Date: 1993
Texas A&M Univ-Col of Medicine

PARIDA, BASANT K
Citizenship: India
Adviser: Dr. Shankar Mall
Research Field: Fatigue
Research Title: Some Studies on the Local Buckling Behavior of Thin Sheets with Rectangular Cut-Outs

Ph.D. Date: 1977
Indian Inst of Tech, Kharagpur

Recommended Candidates 8/15/2001 - 10/14/2002
Air Force Research Laboratory

Attachment 4

1/10/2003 Page 7 of 7

PHILLIPS, DAVID M
Citizenship: United States
Adviser: Dr. Jeffrey S. Zabinski
Research Field: Tribology
Research Title: Ultra-Thin Liquid Films for MEMS Lubrication

Ph.D. Date: 2002
Carnegie Mellon University/PA

A- Accepted Award (2 Applicants listed)

PENDER, MARK J
Citizenship: United States
Adviser: Dr. Morley O. Stone
Research Field: Biotechnology
Research Title: Biologically Inspired Routes for the Synthesis and Construction of Ordered Arrays of Carbon Nanotubes

Ph.D. Date: 2001
University of Pennsylvania
Actual Starting Date: 12/16/02
Termination Date: 12/15/03

POZHAR, LIUDMILA A
Citizenship: Ukraine
Adviser: Dr. William C. Mitchel
Research Field: Chemical Physics
Research Title: Theoretical and Computational Fundamentals of Virtual Fabrication of Nanoheterostructure Units with Designed Electronic Properties

Ph.D. Date: 1994
Ukraine Academy of Sciences
Actual Starting Date: 1/06/03
Termination Date: 1/05/04

Air Force Research Laboratory

Castle, Karen Janene

7/17/2000 5/31/2002

- 2 Characterized vibrational energy transfer efficiencies for the NO(v)-O systems for v=1 and 2 at room temperature and for v=1 between 295 and 850 K
- 3 Explored possible experimental approaches for measuring the CO₂ (ν_2) - O vibration relaxation: achieved stimulated Raman excitation of the CO₂ bending mode and monitored relaxation using transient diode laser absorption.
- 4 Acquired/learned to use a Brunker step-scan FTIR spectrometer for measuring time-resolved reaction product distributions; worked with Bruker technicians to improve OPUS software and develop experimental approach.
- 5 Acquired FTIR data following O* + C₂H₄ and O* + C₃H₆ reactions (products included vibrationally excited alkene, CO, HCO, and H₂CO) and developed computer model for analyzing CO product distribution from multiple pathways.
- 6 Explored the effects of using different o-atom sources on O* + C₂H₄ reaction, and found that NO₂ and SO₂ sources yield very different CO product distributions.

Hinsz, Verlin Blaine

8/01/2001 7/31/2002

- 2 Modeling crew performance in dynamic task environments.
- 3 Representing performance of UAV ground station crews.
- 4 Benchmarks for AWACS weapons director crews.
- 5 Implications of a teams-as-information-processors perspective.
- 6 Implications of information processing biases in teams for information warfare.

Miller, J. Scott

7/17/2000 3/04/2002

- 2 Developed the capability to measure the collisional energy dependence of state-selected ion-molecule reaction dynamics at the LBNL Advanced Light Source.
- 3 Determined absolute Xenon charge exchange cross sections for direct use in electrostatic thruster models.

Air Force Research Laboratory

- 4 Measured the influence of a charge transfer pathway on vibrational effects in ion-molecule reaction dynamics for use in vibrational scaling models.

Oka, Soichi

6/28/2001 6/27/2002

- 2 Image mining of evanescent microwave data for nondestructive material inspection.

- 3 Image mining using coupled unsupervised neural networks.

Park, Soo-Young

3/01/2000 2/20/2002

- 2 Studies on the structure and molecular modeling of poly(silylenemethylene)s

- 3 Studies on structures and molecular modeling of naphthalene-based rigid rod polymers.

- 4 Studies on the structures of sulfone-containing polymers.

- 5 Studies on the wholly-aromatic thermotropic polyesters.

- 6 Studies on the morphology of the PBO film for the fuel cell membrane.

Rotman, Stanley Richard

10/01/2001 9/30/2002

- 2 Demonstrated segmentations of hyperspectral imagery based on the most significant principal components of the hyperspectral data cube.

- 3 Two methods of detecting point targets in hyperspectral images were attempted. The first uses the principal component images, the second is based on a median-filtered full hyperspectral cube. Detection vs. false alarm comparisons are made.

- 4 Developed a course on the digital signal processing of hyperspectral imagery. I taught this course to interested AFRL personnel.

Air Force Research Laboratory

Wilson, John Patrick

8/20/2001 8/19/2002

- 2 Found that it is not possible to construct a Uniform Reconstruction Quantizer that is a Successive Refinement Quantizer.
- 3 Approach to embedded context-based adaptive quantization along the lines of the non-embedded work of Bin Yu et al., appears infeasible because sufficient knowledge of data is not known at point where adaptation would occur.
- 4 Examined constructing suboptimal non-uniform successive refinement quantizers. Believe that constrained versions of optimal algorithm is appropriate approach.
- 5 As alternative approach to 2, looked at using ideas from Li and Lei's approach to rate-distortion optimal embedding to guide adaptive quantization. Literature caused me to realize efficient zero coding of significance decisions more appropriate.

5) NAME OF RESEARCH ADVISER

James Dodd

6) TITLE OF RESEARCH PROPOSAL

Collisions Between Small Hydrocarbons and Hyperthermal Oxygen Atoms

7) SUMMARY OF RESEARCH DURING TENURE

Itemize significant findings in concise form, utilizing key concepts/words.

- 1) Characterized vibrational energy transfer efficiencies for the NO(v)-O system for v=1 and 2 at room temperature and for v=1 between 295 and 850 K
- 2) Explored possible experimental approaches for measuring the CO₂ (nu₂) - O vibrationa relaxation: achieved stimulated Raman excitation of the CO₂ bending mode and monitored relaxation using transient diode laser absorption
- 3) Acquired/learned to use a Bruker step-scan FTIR spectrometer for measuring time-resolved reaction product distributions, worked with Bruker technicians to improve OPUS software and develop experimental approach
- 4) Acquired FTIR data following O* + C₂H₄ and O* + C₃H₆ reactions (products included vibrationally excited alkene, CO, HCO, and H₂CO) and developed computer model for analyzing CO product distributions from multiple pathways
- 5) Explored the effects of using different o-atom sources on the O*+C₂H₄ reaction, and found that NO₂ and SO₂ sources yield very different CO product distributions

8) RESEARCH IN PROGRESS

Describe in no more than 100 words.

Vibrationally excited product distributions resulting from collisions between translationally excited O-atoms and small alkenes are being measured via step-scan FTIR emission spectroscopy. Products such as vibrationally excited C₂H₄, CO, HCO, and H₂CO have been clearly identified from the ethylene-O reaction, with CO being the dominant IR-emitting product. Following propylene-O collisions, only vibrationally excited CO and C₃H₆ have been identified. A model has been developed for characterizing CO product distributions, and preliminary analysis has shown a striking difference between the two O-atom precursors SO₂ and NO₂. In my remaining time at AFRL, the model will be improved, data analysis will continue, and the 1-butene-O* reaction will be investigated.

13) *PROFESSIONAL AWARDS RECEIVED DURING TENURE*

N/A

14) *NEW POSITION TITLE*

Assistant Professor

15) *NEW POSITION ORGANIZATION* Provide name and address of organization.

Bucknell University
Department of Chemistry
Lewisburg, PA 17837

16) *NEW POSITION STATUS / CATEGORY* Please indicate only one.

- ☐ Remain at Host Agency as Permanent Employee
☐ Remain at Host Agency as Contract/Temporary Employee

Abbreviate Host Laboratory/Center _____

- ☐ Research Position at Another US Government Laboratory
☐ Administrative Position at US Government Laboratory
☐ Research Position at Foreign Government Laboratory

- ☒ Research/Teaching at US College/University
☐ Research/Teaching at Foreign College/University
☐ Research/Admin Position in Industry
☐ Research/Admin in Non-Profit Organization
☐ Postdoctoral Research
☐ Self Employed
☐ Other Please specify _____

17) **APPRAISAL OF THE ASSOCIATESHIP PROGRAM** Please rate each of the following on a scale of 1 (poor) to 10 (excellent).

Your experience as a NRC Research Associate in this federal Laboratory

8 Short-term value: development of knowledge, skills, and research productivity

Comments:

Lab personell have helped me develop skills in an area of research that was relatively new to me. The only real drawback was the delay in acquiring functioning equipment. It has also been somewhat difficult to obtain permission to present and publish work.

10 Long-term value: how your NRC Associateship award affected your career to date

Comments:

This program really helped me decide what career path I'd like to take. I plan to continue with a related topic of research in my next position.

Administrative Support

8 Quality of the support you received from the federal Laboratory

8 Quality of the support you received from the NRC staff

Comments:

Some of my voice mail and email messages were either never answered or the responses were very slow. Otherwise, I have no complaints. I was pleasantly surprised that I never received a paycheck or a travel reimbursement later than expected.

18) **PLEASE PROVIDE ANY SUGGESTIONS FOR PROGRAM IMPROVEMENT**

The renewal process could be done a little more smoothly. Approval for my renewal wasn't granted until about 2 weeks before the end of my tenure.. not much time to find another position if necessary. It would be even better if appointments were initially made for 2 years rather than 1.

5) NAME OF RESEARCH ADVISER

Barry P. Goettl (upon the retirement of Sam Schiflett)

6) TITLE OF RESEARCH PROPOSAL

Crew Performance in Dynamic Task Environments

7) SUMMARY OF RESEARCH DURING TENURE Itemize significant findings in concise form, utilizing key concepts/words.

- 1) Modeling Crew Performance in Dynamic Task Environments
- 2) Representing Performance of UAV Ground Station Crews
- 3) Benchmarks for AWACS Weapons Director Crews
- 4) Implications of a teams-as-information-processors perspective
- 5) Implications of information processing biases in teams for information warfare

8) RESEARCH IN PROGRESS Describe in no more than 100 words.

I am working with members of the lab on data collection on a set of projects related to individual and team performance on a dynamic decision making task (AWACS Weapons Directors). AFOSR has asked AFRL-HEAI to conduct research to establish benchmarks for performance on the AWACS task. Because this NRC Associateship will not be renewed, data collection will be continued with AFRL scientists once my tenure ends. These scientists and I will then try to write up the results for publication (one project will result in a chapter invited for an edited volume of the Human Factors Society).

9) PUBLICATIONS AND PAPERS RESULTING FROM NRC ASSOCIATESHIP RESEARCH

Provide complete citations: author(s), title, full name of journal, volume number, page number(s), and year of publication.

a) Publications in peer-reviewed journals

Due to the lengthy time lags in review and publication, no publications occurred during my award period.

b) Books, book chapters, other publications

Hinsz, V.B. (in press). Metacognition and mental models in groups: An illustration with metamemory of group recognition memory. To appear in E. Salas, S.M. Fiore, & J. A. Cannon-Bowers (Eds.), Team Cognition: Process and Performance at the Inter- and Intra-Individual Level. Washington, DC: American Psychological Association.

17) APPRAISAL OF THE ASSOCIATESHIP PROGRAM Please rate each of the following on a scale of 1 (poor) to 10 (excellent).**Your experience as a NRC Research Associate in this federal Laboratory****8** Short-term value: development of knowledge, skills, and research productivity**Comments:**

I have been able to gain exposure to a variety of research topics of interest to the Air Force Research Laboratory. I also had the ability to spend time thinking about a number of questions related to team and individual performance on complex, dynamic tasks. Consequently, I was able to write up a number of projects while I was located at the Lab.

8 Long-term value: how your NRC Associateship award affected your career to date**Comments:**

I found the award to be very valuable. My time at the Lab was rewarding. I believe my stature in the research community has increased based on the reputation I have gained from spending time in the lab. The true influence of the award on my career will be seen in the coming decade or so.

Administrative Support**7** Quality of the support you received from the federal Laboratory**5** Quality of the support you received from the NRC staff**Comments:**

The travel expense report was inappropriate for personal travel, and NRC people got confused numerous times. Better instructions are required, and different categories of travel should be used. The mail problem at NRC was also very annoying.

18) PLEASE PROVIDE ANY SUGGESTIONS FOR PROGRAM IMPROVEMENT

Provide more information about how funding levels are determined for senior associates. Provide more information about how to complete travel forms. It is good to see that much of the paper work is now moving to the web, and so it is easier to complete at a workstation.

4) Current Agency	Laboratory or NASA Center	Division / Branch / Directorate	
AFRL		VSBXT	

5) NAME OF RESEARCH ADVISER

Rainer A. Dressler

6) TITLE OF RESEARCH PROPOSAL

State resolved reaction dynamics in collision induced dissociation of small, vibrationally excited diatomic and dimer ions

7) SUMMARY OF RESEARCH DURING TENURE Itemize significant findings in concise form, utilizing key concepts/words.

- 1) Developed the capability to measure the collisional energy dependence of state-selected ion-molecule reaction dynamics at the LBNL Advanced Light Source
- 2) Determined absolute Xenon charge exchange cross sections for direct use in electrostatic thruster models
- 3) Measured the influence of a charge transfer pathway on vibrational effects in ion-molecule reaction dynamics for use in vibrational scaling models
- 4)
- 5)

8) RESEARCH IN PROGRESS Describe in no more than 100 words.

9) PUBLICATIONS AND PAPERS RESULTING FROM NRC ASSOCIATESHIP RESEARCH

Provide complete citations: author(s), title, full name of journal, volume number, page number(s), and year of publication.

a) Publications in peer-reviewed journals

Miller, J.S., Pullins, S.H., Levandier, D.J., Chiu, Y.-h., Dressler, R.A., "Xenon charge exchange cross sections for electrostatic thruster models", J. Appl. Phys. 91, 948, 2002

b) Books, book chapters, other publications

c) Manuscripts in preparation, manuscripts submitted

"Chemical Reaction Dynamics of Highly Vibrationally excited Molecular Ions", Ximei Qian, Tao Zhang, Cheuk Y. Ng, Yu-hui Chiu, Dale J. Levandier, J. Scott Miller, Rainer A. Dressler to be submitted to Science

"Effects of charge-transfer in the collision-induced dissociation of the Ar₂⁺ + Ar/Ne systems" Miller, J.S., Chiu, Y.-h., Levandier, D.J., Dressler, R.A.

10 PATENT OR COPYRIGHT APPLICATIONS RESULTING FROM NRC ASSOCIATESHIP RESEARCH

Provide titles, inventors, and dates of applications.

11) *PRESENTATIONS AT SCIENTIFIC MEETINGS OR CONFERENCES*

Provide complete references: author(s), title, abstract/proceeding citation, meeting name and location.

International

Domestic

Miller, J.S., Dressler, R.A., Chiu, Y.-h., Levandier, D.J. "Vibrational effects in collision-induced dissociation dynamics of diatomic ions", presented at the 221st ACS National Meeting April 1-5, 2001, San Deigo, CA

12) *SEMINARS OR LECTURES DELIVERED AT UNIVERSITIES AND/OR INSTITUTES* Include dates, names and locations of seminars.

13) *PROFESSIONAL AWARDS RECEIVED DURING TENURE*

Air Force Office of Scientific Research Star Team Award, 2000

14) *NEW POSITION TITLE*

Research Chemist

15) *NEW POSITION ORGANIZATION* Provide name and address of organization.

Naval Surface Warfare Center - Indian Head Division

16) *NEW POSITION STATUS / CATEGORY* Please indicate only one.

17) *APPRAISAL OF THE ASSOCIATESHIP PROGRAM* Please rate each of the following on a scale of 1 (poor) to 10 (excellent).

Your experience as a NRC Research Associate in this federal Laboratory

7 Short-term value: development of knowledge, skills, and research productivity

Comments:

My AFRL / NRC experience has significantly broadened my scientific KSAs, as I chose a significantly different field from my graduate research in which to perform my post-doctoral work. My exposure to the current interests of the Air Force has shed new light on my understanding of DOD mission critical and mission essential capabilities, and the role I can play in the development of these technologies.

9 Long-term value: how your NRC Associateship award affected your career to date

Comments:

My NRC experience was essential to placing my current position. I believe the reputation of the NRC-RAP, my experience of performing research in a DOD facility, and the depth of experience provided by the RAP were equally important in obtaining my current position as a research chemist for the U.S. Navy.

Administrative Support

7 Quality of the support you received from the federal Laboratory

10 Quality of the support you received from the NRC staff

Comments:

18) *PLEASE PROVIDE ANY SUGGESTIONS FOR PROGRAM IMPROVEMENT*

I believe that the NRC Research Associateship Program could benefit greatly by providing specific management guidance to NRC-RAP advisors. I have seen that MANY scientists are thrust into program management, and are never trained in people management. I feel this is even more critical an issue in programs such as the NRC-RAP, since the competitive nature of the program attracts people capable of new ideas and independent research, which may or may not be nurtured in some facilities.

5) NAME OF RESEARCH ADVISER

Dr. D.S. Dudis/Dr. Barry Farmer

6) TITLE OF RESEARCH PROPOSAL

Analysis of the Crystal Structure of Poly(difluorosilylenemethylene)

7) SUMMARY OF RESEARCH DURING TENURE

Itemize significant findings in concise form, utilizing key concepts/words.

- 1) Studies on the structures and molecular modeling of poly(silylenemethylene)s
- 2) Studies on the structures and molecular modeling of naphthalene-based rigid rod polymers
- 3) Studies on the structures of sulfone-containing polymers
- 4) Studies on the wholly-aromatic thermotropic polyesters
- 5) Studies on the morphology of the PBO film for the fuel cell membrane

8) RESEARCH IN PROGRESS

Describe in no more than 100 words.

The structures of novel polymers such as poly(silylenemethylene)s, sulfone-containing polymers, naphthalene-based rigid rod polymers, wholly-aromatic thermotropic polyesters and PBO films for fuel cell membrane were studied using X-ray, SEM, TEM and molecular modeling techniques. We can determine the chain conformations and chain packings in the crystals of these polymers through the close examination of X-ray and Electron diffraction patterns with associated molecular modeling techniques. From these studies, we found that the chemical modifications such as changing alkyl side chain length in poly(silylenemethylene)s, the replacement of phenylene ring with naphthalene ring in the rigid rod polymers, introduction of the sulfone groups in the side chains, and etc give huge effects on the structures, which are, in turn, strongly related to the properties of these polymers.

9) PUBLICATIONS AND PAPERS RESULTING FROM NRC ASSOCIATESHIP RESEARCH

Provide complete citations: author(s), title, full name of journal, volume number, page number(s), and year of publication.

a) Publications in peer-reviewed journals

1. "The Structure of Poly(di-n-propylsilylenemethylene)", S.Y. Park, L.V. Interrante, and B.L. Farmer, Polymer, 42(9), 4253, 2001.

12) *SEMINARS OR LECTURES DELIVERED AT UNIVERSITIES AND/OR INSTITUTES* Include dates, names and locations of seminars.

13) *PROFESSIONAL AWARDS RECEIVED DURING TENURE*

14) *NEW POSITION TITLE*

assistant professor

15) **NEW POSITION ORGANIZATION** Provide name and address of organization.

Department of polymer science and engineering, Kyungbuk National University, 1370, SanKyeK-Dong, Buk-Gu, DaeKu, Korea (ROK), 702-701.

16) **NEW POSITION STATUS / CATEGORY** Please indicate only one.

- ☐ Remain at Host Agency as Permanent Employee
☐ Remain at Host Agency as Contract/Temporary Employee
Abbreviate Host Laboratory/Center _____
☐ Research Position at Another US Government Laboratory
☐ Administrative Position at US Government Laboratory
☐ Research Position at Foreign Government Laboratory

- ☐ Research/Teaching at US College/University
☒ Research/Teaching at Foreign College/University
☐ Research/Admin Position in Industry
☐ Research/Admin in Non-Profit Organization
☐ Postdoctoral Research
☐ Self Employed
☐ Other Please specify _____

17) **APPRAISAL OF THE ASSOCIATESHIP PROGRAM** Please rate each of the following on a scale of 1 (poor) to 10 (excellent).

Your experience as a NRC Research Associate in this federal Laboratory

8 Short-term value: development of knowledge, skills, and research productivity

Comments:

I have gathered a lot of knowledge from AFRL personnels and developed a lot of skills during my tenure. However, the security issues for foreign nationals in military base cause sometimes difficulties such as working at weekend and using networks, etc.

9 Long-term value: how your NRC Associateship award affected your career to date

Comments:

Working as a NRC research associate in the federal nation laboratory helps me to find my professional job. I would like to appreciate my current advisor, Dr. Barry Farmer and to continue collaboration with AFRL after my tenure.

Administrative Support

7 Quality of the support you received from the federal Laboratory

8 Quality of the support you received from the NRC staff

Comments:

Reimbursement process for travel seems a little bit slow. I had also a little difficulty in arranging my travel through NAS travel agency because of low diem rate for hotel arranged by meeting organization.

5) NAME OF RESEARCH ADVISER

Jerry Silverman/ Richard Soref

6) TITLE OF RESEARCH PROPOSAL

Signal Processing of Hyperspectral Data

7) SUMMARY OF RESEARCH DURING TENURE Itemize significant findings in concise form, utilizing key concepts/words.

- 1) We demonstrate segmentations of hyperspectral imagery based on of the most significant principal components of the hyperspectral data cube. Anomalous pixels are then found and morphological operations allow us to detect targets.
- 2) Two methods for detecting point targets in hyperspectral images were attempted. The first uses the principal component images; the second is based on a median-filtered full hyperspectral cube. Detection vs. false alarm comparisons are made.
- 3) Developed a course on the digital signal processing of hyperspectral imagery. I taught this course to interested AFRL personnel.
- 4)
- 5)

8) RESEARCH IN PROGRESS Describe in no more than 100 words.

We are continuing to work on point target anomaly detection. We will use the sophisticated techniques of orthogonal subspace projection to eliminate background clutter and improve the signal to noise ratio.

9) PUBLICATIONS AND PAPERS RESULTING FROM NRC ASSOCIATESHIP RESEARCH

Provide complete citations: author(s), title, full name of journal, volume number, page number(s), and year of publication.

17) *APPRAISAL OF THE ASSOCIATESHIP PROGRAM* Please rate each of the following on a scale of 1 (poor) to 10 (excellent).

Your experience as a NRC Research Associate in this federal Laboratory

10 Short-term value: development of knowledge, skills, and research productivity

Comments:

I have been introduced to an entirely new field for me, i.e. hyperspectral signal processing. I have been given the opportunity to work with experts in the field who have been working in this for years; I have been given access to data. This year has been wonderful in introducing me in the best way possible to this field.

10 Long-term value: how your NRC Associateship award affected your career to date

Comments:

I fully expect to continue working in this field. I have submitted a proposal for continued work to the EOARD; I have been contacted by several companies in Israel that are interested in this area of work. This was a jump start for me that I really needed.

Administrative Support

10 Quality of the support you received from the federal Laboratory

10 Quality of the support you received from the NRC staff

Comments:

The NRC was extremely willing to help with all aspects of my move and my stay here in the U.S. The laboratory as a whole, the branch chief Paul Pellegrini, and the researchers in the brance (and, in particular, my supervisor Jerry Silverman and my coworker Charlene Cafer) have been most generous with their time and efforts in helping me.

18) PLEASE PROVIDE ANY SUGGESTIONS FOR PROGRAM IMPROVEMENT

I'm sorry - it's been perfect. (And I'm not just saying that - this is easily the best working environment that I have ever been in over the last 26 years.)

FINAL REPORT

Enter information electronically in Layout view.

Return this form directly to the NRC as an E-mail attachment, or print out and mail or fax.

1) Associate Last or Family Name		First Name	M.I.
Wilson		John	P
2) FORWARDING Address (to which your tax statement will be mailed)		FORWARDING Phone and E-Mail (if known)	
10047 Phillips Rd. Lafayette, CO 80026		(303) 665-9658 wilsonjohnpat@acm.org	
3) Today's Date		Dates of Tenure	
August 19, 2002		from August 20, 2001 to August 19, 2002	
4) Current Agency	Laboratory or NASA Center	Division / Branch / Directorate	
AFRL		Information Directorate	

5) NAME OF RESEARCH ADVISER

Bruce Suter

6) TITLE OF RESEARCH PROPOSAL

Compression of High Data Rate Sources: Theoretical Gains with Non-Ideal Models

7) SUMMARY OF RESEARCH DURING TENURE Itemize significant findings in concise form, utilizing key concepts/words.

- 1) Found that it is not possible to construct a Uniform Reconstruction Quantizer that is a Successive Refinement Quantizer
- 2) Approach to embedded context-based adaptive quantization along the lines of the non-embedded work of Bin Yu et al., appears infeasible because sufficient knowledge of data is not known at point where adaptation would occur.
- 3) Examined constructing suboptimal non-uniform successive refinement quantizers. Believe that constrained version of optimal algorithm is appropriate approach.
- 4) As alternative approach to 2, looked at using ideas from Li and Lei's approach to rate-distortion optimal embedding to guide adaptive quantization. Literature caused me to realize efficient zero coding of significance decisions more appropriate.
- 5)

8) RESEARCH IN PROGRESS Describe in no more than 100 words.

I am currently implementing a channel coder for use with ERC-SPIHT video coder.

I have also developed a number of ideas for further research examining using knowledge of error to steer processing of data and examining how errors are passed through the wavelet transform.

9) PUBLICATIONS AND PAPERS RESULTING FROM NRC ASSOCIATESHIP RESEARCH

Provide complete citations: author(s), title, full name of journal, volume number, page number(s), and year of publication.

a) Publications in peer-reviewed journals

N/A

b) Books, book chapters, other publications

N/A

c) Manuscripts in preparation, manuscripts submitted

N/A

10) PATENT OR COPYRIGHT APPLICATIONS RESULTING FROM NRC ASSOCIATESHIP RESEARCH

Provide titles, inventors, and dates of applications.

N/A

11) PRESENTATIONS AT SCIENTIFIC MEETINGS OR CONFERENCES

Provide complete references: author(s), title, abstract/proceeding citation, meeting name and location.

International

John P. Wilson, Compression of Barotropic Turbulence Simulation Data using Wavelet-based Lossy Coding, Proceedings ASME Fluids Engineering Division Summer Meeting, Montreal, Quebec, Canada, July 2002.

Domestic

John P. Wilson, Wavelet-based Lossy Compression of Barotropic Turbulence Simulation Data, IEEE Data Compression Conference Poster Session, Snowbird, Utah, April 2002.

12) *SEMINARS OR LECTURES DELIVERED AT UNIVERSITIES AND/OR INSTITUTES* Include dates, names and locations of seminars.

N/A

13) *PROFESSIONAL AWARDS RECEIVED DURING TENURE*

N/A

14) *NEW POSITION TITLE*

No position

15) *NEW POSITION ORGANIZATION* Provide name and address of organization.

N/A

16) *NEW POSITION STATUS / CATEGORY* Please indicate only one.

- ☐ Remain at Host Agency as Permanent Employee
☐ Remain at Host Agency as Contract/Temporary Employee
Abbreviate Host Laboratory/Center _____
☐ Research Position at Another US Government Laboratory
☐ Administrative Position at US Government Laboratory
☐ Research Position at Foreign Government Laboratory

- ☐ Research/Teaching at US College/University
☐ Research/Teaching at Foreign College/University
☐ Research/Admin Position in Industry
☐ Research/Admin in Non-Profit Organization
☐ Postdoctoral Research
☐ Self Employed
☒ Other Please specify Unemployed

17) *APPRAISAL OF THE ASSOCIATESHIP PROGRAM* Please rate each of the following on a scale of 1 (poor) to 10 (excellent).

Your experience as a NRC Research Associate in this federal Laboratory

5 Short-term value: development of knowledge, skills, and research productivity

Comments:

I arrived with about 6 projects, which resulted in a 9 item research to do list. The vast majority of my projects resulted in either negative results or explorations showed that the project was unlikely to be worthwhile. There were two projects which I felt had substantial merit which I made little progress on due to the need to have discussions with persons in the exploitation section.

4 Long-term value: how your NRC Associateship award affected your career to date

Comments:

I have managed to flesh out some of my research ideas related to the interaction of data compression with the processing of the data.

Administrative Support

8 Quality of the support you received from the federal Laboratory

6 Quality of the support you received from the NRC staff

Comments:

I had significant problems with the responsiveness of NRC staff.

18) *PLEASE PROVIDE ANY SUGGESTIONS FOR PROGRAM IMPROVEMENT*
